

Listeners do not need an F1/F2 target to perceive vowel quality *or* regional accentedness

Kevin B. McGowan, Stella Takvoryan
Department of Linguistics, University of Kentucky

1. BACKGROUND

- Background Text with bullets
- More information
- Even more information
- Even more information than you wanted

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis sagittis posuere ligula sit amet lacinia. Duis dignissim pellentesque magna, rhoncus congue sapien finibus mollis. Ut eu sem laoreet, vehicula ipsum in, convallis erat. Vestibulum magna sem, blandit pulvinar augue sit amet, auctor malesuada sapien. Nullam faucibus leo eget eros hendrerit, non laoreet ipsum lacinia. Curabitur cursus diam elit, non tempus ante volutpat a. Quisque hendrerit blandit purus non fringilla. Integer sit amet elit viverra ante dapibus semper. Vestibulum viverra rutrum enim, at luctus enim posuere eu. Orci varius natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus.

2. METHODS

Etiam non efficitur urna, quis elementum nisi. Mauris posuere a augue vel gravida. Praesent luctus erat et ex iaculis interdum. Nulla vestibulum quam ac nunc consequat vulputate. Nullam iaculis lobortis sem sit amet fringilla. Aliquam semper, metus ut blandit semper, nulla velit fermentum sapien, fermentum ultrices dolor sapien sed leo. Vestibulum molestie faucibus magna, at feugiat nulla ullamcorper a. Aliquam erat volutpat. Praesent scelerisque magna a justo maximus, sit amet suscipit mauris tempor. Nulla nec dolor eget ipsum pellentesque lobortis a in ipsum. Morbi turpis turpis, fringilla a eleifend maximus, viverra nec neque. Class aptent taciti sociosqu ad litora torquent per conubia nostra, per inceptos himenaeos.

1. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do.
2. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do.
3. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do.

Now we will lay out a manual markdown table with a title. The title is placed after the table. The title is a markdown header, so it will be formatted as such. We are using math notation to get the Greek letters. You can get more details on making markdown tables here (<https://quarto.org/docs/authoring/tables.html>). This is fine for simple, small tables with few cells. For larger, more complicated tables, you will want to use the {gt} package.

Table 1: This is a Table Title

Column 1	Col2	Column 3
Lorem ipsum dolor.	Lorem ipsum.	α
Lorem ipsum.	Lorem ipsum.	β
Lorem.	Lorem.	γ
Lorem ipsum dolor.	Lorem.	θ

Duis urna urna, pellentesque eu urna ut, malesuada bibendum dolor. Suspendisse potenti. Vivamus ornare, arcu quis molestie ultrices, magna est accumsan augue, auctor vulputate erat quam quis neque. Nullam scelerisque odio vel ultricies facilisis. Ut porta arcu non magna sagittis lacinia. Cras ornare vulputate lectus a tristique. Pellentesque ac arcu congue, rhoncus mi id, dignissim ligula.

3. RESULTS

We will place a figure or image below using markdown syntax. We can specify the caption and specifying height or width (or both). The figures are numbered automatically.

Figure 1: The details of a specific serif font.

We can use backslashes to create line breaks in the markdown text. This is a very useful feature for making the text more readable.

Now a fancy table made with the {gt} package

Penguins in the Palmer Archipelago						
Data is courtesy of the {palmerpenguins} R package						
	Adelie		Chinstrap		Gentoo	
	Female	Male	Female	Male	Female	Male
Island: Biscoe						
2007	5	5	-	-	16	17

2008	8	8	-	-	-	-
2009	8	8	-	-	-	-

4. DISCUSSION

We will start with a random **math** equation, just to show that quarto and typst can do *math*. Now some random text so that the yellow box spans two columns. Ut enim aequae doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. We will put this next part in a **maize-colored box** to make it stand out.

$$\sum_{k=1}^n k = \frac{n(n+1)}{2} = \frac{n^2 + n}{2} \quad (1)$$

- That was a math equation bracketed by \$ (which invokes the math translator), notice that the box extends across column breaks. Watch the indent when this extends across a whole line. Note that this box does not have a lot of inset padding, unlike the gray box below, where the text can ‘breathe’.
- Also notice how rounded the corners are (radius) in the two different boxes.
- Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do.

Implications in a Gray Box (0[black]–255[white]) with a Blue Border

1. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do.
2. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do.
3. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do.
4. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do.
5. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do.

Now inserting another plot and controlling the height and width in inches on this 72 in poster. Note the backslash (for a line break) is used on a line by itself to give us a bit of separation between the text and the plot.

Figure 2: A fabulous plot made in R.
